

Gardening Tips – January

Don't forget to water, if precipitation is not sufficient, especially before a predicted freeze.

Check out the plant catalogs and magazines for new selections for 2019.

Check out the "Mesonet", www.mesonet.org, and explore all the useful information available for gardeners on the site.

Another application of dormant oil can be applied to control overwintering insects.

Apply post-emergent when temperatures are above 50 degrees to control winter weeds.
Consider adding Roundup for weed control on dormant Bermuda grass.

Do a soil test every 3 years to plan your fertilizing needs for flower gardens, vegetable gardens and lawns.

Get your vegetable garden ready for planting mid-February through March by weeding, adding organic matter and fertilizer.
